

WHAT IS CLAIMED IS:

1. A magnetic recording medium, comprising a primer layer containing at least nonmagnetic powder on a support member and at least one layer of magnetic layer containing ferromagnetic powder dispersed in a binder, the magnetic layer being placed on the support member, wherein the primer layer comprises at least one type of compound expressed by the following general formula (1);

General formula (1)

where R^1 , R^2 , R^3 , and R^4 each represents an alkyl group having 2 to 7 carbon atoms.

2. A magnetic recording medium according to claim 1, wherein thickness of the magnetic layer is within the range of 0.05 to 1 μm .

3. A magnetic recording medium according to claim 1, wherein said magnetic recording medium is a disk-type magnetic recording medium.

4. A magnetic recording medium according to claim 1, wherein said magnetic recording medium contains 0.1 to 50 weight parts to 100 weight parts of nonmagnetic powder.

5. A magnetic recording medium according to claim 1, wherein said magnetic recording medium contains 1 to 25 weight parts to 100 weight parts of nonmagnetic powder.
